

DURAPRO[®]

DURAPRO[®] M-225 HOTMELT ADHESIVE

Fast and Reliable Performance for Case and Carton Sealing

Superior Adhesion for Demanding Packaging Applications

DURAPRO[®] M-225 is a high-performance hotmelt adhesive designed for **high-speed case and carton sealing**. Specially formulated for **wrap-around case sealers**, it provides **instant adhesion and ultra-fast set speed**, reducing the risk of pop-opens. Its **water-white appearance** makes it an ideal choice for **food and beverage packaging**, ensuring a clean finish with no visible glue lines.

Why Choose DURAPRO[®] M-225?

- **Fast Set Speed** – Optimizes production line efficiency.
- **Excellent Hot Tack** – Holds flaps down immediately, preventing unwanted openings.
- **High Heat Resistance** – Maintains bond integrity even in high-temperature transit and storage conditions.
- **Clean Application** – Less stringing and reduced char for cleaner operation.
- **Water-White Appearance** – No visible glue lines, perfect for premium packaging.
- **Food-Safe Packaging** – Compliant with **21CFR175.105** for indirect food contact.

Typical Applications

- Food and Beverage Packaging
- Corrugated Boxes and Trays
- Clay-Coated Board Packaging

Technical Specifications

- **Viscosity:** 1,050 cps at 350°F
- **Softening Point:** 225°F
- **Application Temperature:** 325° - 375°F
- **Type:** Modified Synthetic Resin
- **Color:** Water White

Reliable Strength, Clean Appearance

DURAPRO[®] M-225 combines **fast, strong adhesion** with **clean performance**, making it a trusted solution for **high-speed, high-volume packaging operations**. Whether sealing cases in **demanding manufacturing environments** or ensuring secure packaging in **extreme conditions**, the DURAPRO[®] M-225 provides **reliable adhesion without compromise**.

Contact us today to **test DURAPRO[®] M-225** in your packaging operation and experience the difference!
